

Commercial & Industrial Scaffold Design Project Manager

Tri-City Scaffold Co., Inc., located in Delanson, New York, is searching for a Commercial & Industrial Scaffold Design-Project Manager.

Summary: individual will be responsible for all scaffold technology and technical disciplines that projects involve. Review, design, estimate, schedule, plan, forecast, resource and manage all the technical activities aiming at assuring project accuracy and quality from conception to completion.

Specific responsibilities include: evaluate, design, estimate, complete basic structural, coordinating and monitoring the assigned scaffold projects. Monitoring compliance to applicable codes, practices, OSHA policies, performance standards and specifications. Interacting daily with the clients to interpret their needs and requirements and representing them in the field. Prepare, schedule, coordinate and monitor the assigned scaffold projects. Using computer software (e.g., Autocad or similar) or with drafting tools, prepare drawings to present to customers, engineering and for estimating purposes. Perform overall quality control of the work (i.e., budget, schedule, plans, personnel's performance) and report regularly on project status. Determine feasibility of designs based on customer needs, safety, function, serviceability, budgeting costs/methods. Assign responsibilities and mentor project team. Cooperate and communicate effectively with project managers and other project participants to give assistance and technical support. Work with customers to modify designs and adapt to customers specifications or changes. Review with engineering and/or customers, deliverables and initiate appropriate corrective actions.

Experience Requirements: Twenty-four months' experience as a Scaffold Design-Project Manager. Twenty-four months' field experience as Project Manager, Foreman and Scaffold Builder. | Twenty-four months' training in (a) static loads, (b) technical drawings and calculations, (c) developing company management strategies; and (d) scaffold technology.

Special skills: Excellent knowledge of design and visualizations software such as Autocad. Advanced MS Office skills. Ability to work with multiple discipline projects. Project management and supervision skills. Decision making ability and leadership skills. OSHA 10 and OSHA 30 certifications. Time management and organization skills. Able to teach/train employees and apply their professional competence in classroom environment. Able to adapt to new requirements.

Travel Requirements: To and from job sites in Albany, Clinton and Columbia counties.
